

KHIE Coordinating Council BD&F Status Update

September 17, 2012

BD&F Committee Activities

- Prepared Sustainability Section for SOP submitted to ONC
- Actively followed published research
- Market surveillance
- Refined the KHIE finance model (in conjunction with GOEHI staff)
- Recommended revenue model

KHIE is funded through **September 2013** by a \$9.75M Grant from the Office of the National Coordinator for HIT-ARRA, Div A Approp, Subtitle B—IT Professionals in Health Care, Sec 3016 of the PHSA

KHIE has identified four potential sources of revenue:

- **An additional General Fund appropriation from the Kentucky General Assembly**
- **Subscription fees**
- **Value-added services (including analytics and reporting)**
- **Third party services that utilize the KHIE infrastructure**

If it is not feasible to secure funding through an additional General Fund appropriation, it is the intent of GOEHI to request that KHIE be supported by subscription fees. Should fees be required, the fee structure is based upon a “fair share” contribution by all stakeholders.
